

# Mohamed Thabet

## BACKEND DEVELOPER

Egypt, Beni-Suef | [mohamedthabetthabet36@gmail.com](mailto:mohamedthabetthabet36@gmail.com) | <https://www.linkedin.com/in/mohamed-thabet-5694462a0> | <https://mohamedthabt.github.io> | +201095843957

## Summary

---

Backend Developer specializing in **PHP/Laravel** with a strong focus on **cybersecurity** and **AI-powered applications**. Skilled in building **secure, scalable web platforms** and exploring **Retrieval-Augmented Generation (RAG)** to enhance knowledge-driven systems. Experienced in authentication, database optimization, and software architecture, with a passion for integrating **modern backend development** with **AI-assisted automation**

## Education

---

Beni-Suef University | Beni-Suef

Computer and Artificial Intelligence

06/2026

**Major:** Computer Science | **Minor:** Information Systems

**Year:** Final-Year Student

**GPA:** 3.2 / 4.0

## Experience

---

Information Technology Institute (ITI) | Remote

Internship Student

07/2024 - 08/2024

- Gained hands-on experience with core web technologies, including HTML, CSS, PHP, and MySQL, to build dynamic and interactive websites.
- Developed foundational knowledge in database fundamentals and structured data storage.
- Worked with WordPress to create and manage website content, enhancing both functionality and design elements.

Freelance Backend Developer | Remote

Backend Engineer (Laravel/PHP) |

12/2024 – 07/2025 (8 months)

- Delivered backend solutions for clients using Laravel, PHP, and MySQL.
- Developed and deployed custom web applications, including authentication, role-based access, and RESTful APIs.
- Integrated payment gateways and real-time features for e-commerce and service platforms.
- Collaborated with clients to analyze requirements, design database schemas, and optimize performance.

## Projects

---

## Reelrz.com – Freelancing Platform (MVP) | *Laravel Backend + Flutter & React Frontend*

- Designed and developed the backend architecture for a freelancing marketplace.
- Implemented a multi-payment system with wallets, payouts, and gateway integrations.
- Integrated **Firebase** for push notifications
- Used **Cloudflare R2** for file storage and **Cloudflare Stream** for video hosting/streaming.
- Built real-time messaging & notifications with **Laravel + Pusher**.
- Implemented advanced logging & monitoring with Sentry, local log files, and a Telegram channel.
- Documented **REST APIs** and supported React (with Inertia) & Flutter clients for seamless integration.
- **Stack:** Laravel, MySQL, Flutter, React, Inertia, Pusher, REST APIs, Firebase, Cloudflare R2, Cloudflare Stream

## E-Learning Platform | *Laravel Application*

- Built an online learning system with multiple user roles (admin, instructor, student).
- Implemented secure authentication, course enrollment, and quiz management.
- Designed a scalable database to manage courses, lessons, quizzes, and student progress.
- Integrated manual enrollment, code-based enrollment, and payment workflows.
- Stack: Laravel, MySQL, DaisyUI, JavaScript

## Technical Skills

---

- **Backend Development:** PHP, Laravel, REST APIs, Payment
- **Frontend Technologies:** HTML, CSS, JavaScript, Bootstrap, daisy UI
- **Database Management:** MySQL, SQL Server, Database Design & Optimization, SQL
- **Version Control:** Git, GitHub,
- **Version Control & Tools:** Git, GitHub, GitHub Projects, Postman, Apidog
- **Real-Time & Messaging:** Pusher, WebSocket
- **Cloud & Services:** Firebase (Notifications), Cloudflare R2, Cloudflare Stream, deployment
- **Software Architecture:** Object-Oriented Programming (OOP), Design Patterns, SOLID Principles
- **Monitoring & Logging:** Sentry, File-based Logging, Telegram Bot Integration

## Soft Skills

---

- **Problem-Solving & Analytical Thinking** – Skilled at debugging, optimizing queries, and designing efficient backend solutions.
- **Communication & Collaboration** – Experienced in freelancing and teamwork, translating client requirements into technical solutions.
- **Leadership** – Successfully **led and coordinated multiple teams**, ensuring smooth collaboration, task delegation, and on-time delivery.
- **Project Management** – Organized workflows using **GitHub Projects**, ensuring timely delivery of milestones.
- **Attention to Detail & Code Quality** – Committed to clean, maintainable, and secure code following best practices.

- **Continuous Learning** – Actively exploring AI concepts such as **Retrieval-Augmented Generation (RAG)** and modern backend technologies.
